Supplement

dated 24 September 2018

to the Base Prospectus for
Tracker Certificates and
Open-End Tracker Certificates
dated 13 August 2018

Supplement

dated 24 September 2018

to the Base Prospectus for
Tracker Certificates and Open-End Tracker Certificates
dated 13 August 2018

Vontobel Financial Products GmbH

Frankfurt am Main, Germany

(the "Issuer")

Vontobel Holding AG

Zurich, Switzerland

(the "Guarantor")

Bank Vontobel Europe AG

Munich, Germany

(the "Offeror")

Right of withdrawal of the investors

According to section 16 para. 3 of the German Securities Prospectus Act (*Wertpapierprospektgesetz*) investors, who have already agreed to purchase or subscribe for the securities issued under the Prospectus this Supplement is relating to before this Supplement is published, have the right, exercisable within two working days after the publication of this Supplement, to withdraw their acceptances, provided that the new circumstance or the inaccuracy causing the Supplement occurred before the final closing of the public offering and before delivery of the securities.

A withdrawal, if any, of an order must be communicated in writing to the respective seller of the security. In case the Issuer is the counterparty of the acquisition, a withdrawal has to be sent to Vontobel Financial Products GmbH, Bockenheimer Landstraße 24, 60323 Frankfurt am Main, Federal Republic of Germany. In case the Offeror is the counterparty of the acquisition, the withdrawal has to be sent to Bank Vontobel Europe AG, Alter Hof 5, 80331 Munich, Federal Republic of Germany. In any other case, the withdrawal has to be sent to the respective counterparty of the acquisition to which the investor has given consent regarding the acquisition or subscription of the securities.

This supplement dated 24 September 2018 (the “**Supplement**”) as well as the Base Prospectus for Tracker Certificates and Open-End Tracker Certificates dated 13 August 2018 (the “**Base Prospectus**”) are published on the website of the Issuer (certificates.vontobel.com) under the heading ‘Legal Documents’. In addition, the Issuer will have copies of the Supplement and the Base Prospectus available free of charge.

Table of contents

1. Reason for the supplement	5
2. Amendments to the Base Prospectus	5
Annex 1: Guide to the e-Commerce Index	6
Annex 2: Guide to the Disruptors Index	7

1. Reason for the supplement

The Issuer announces the following new factors with regard to information contained in the already published Base Prospectus:

- (1) The strategic index with the designation “e-Commerce Index” shall be added as new potential Underlying under the Base Prospectus. This new factor occurred on 19 September 2018.
- (2) The strategic index with the designation “Disruptors Index” shall be added as new potential Underlying under the Base Prospectus. This new factor occurred on 19 September 2018.

2. Amendments to the Base Prospectus

As a result of the reasons for the supplement mentioned under section 1. the Base Prospectus shall be amended as follows:

- (1) In section 15. *Appendix "Vontobel Strategy Indices and Dynamic Baskets"* directly after page 178 of the Base Prospectus the index guide for the “e-Commerce Index” as set out in Annex 1 to this Supplement shall be inserted.
- (2) In section 15. *Appendix "Vontobel Strategy Indices and Dynamic Baskets"* directly after page 178 of the Base Prospectus the index guide for the “Disruptors Index” as set out in Annex 2 to this Supplement shall be inserted.

Guide to the e-Commerce Index

1. Introduction and basic data

This document («**Guide**») describes the composition, calculation and publication of the e-Commerce Index (the «**Index**»). The index reflects the performance of a hypothetical portfolio, which is compiled and continuously managed by the Index Sponsor in accordance with the Strategy determined by it. The Strategy of the Index Sponsor is to select shares from e-Commerce companies operating in the retail, business-to-business (B2B) and logistics sectors, among others.

1.1. Preliminary remarks

This Index forms part of the Vontobel Strategy Indices («**Strategy Indices**») family of indices. **The Strategy Indices are not recognised financial indices, but are indices designed and calculated by Bank Vontobel AG as the Index Calculation Agent, whose sole function consists of serving as the underlying for financial instruments.**

The Index Calculation Agent is advised by index sponsors for the purpose of the composition of the Strategy Indices. **The index sponsors act in principle at their own discretion and within the index strategy defined by themselves and for which they are responsible** (referred to in the following as «**Index Strategy**» or «**Strategy**»; see 2.2).

The Index Calculation Agent will carry out the calculation and composition of the Strategy Indices with the greatest possible care. However, the Index Calculation Agent and the index sponsors accept no obligation or liability with respect to the calculation and composition of the Strategy Indices. The Index Calculation Agent is not liable for direct or indirect losses arising from the incorrect calculation of the indices, their composition or the other key figures, unless they are due to gross negligence or wilful intent on the part of itself, its vicarious agents or their legal representatives. The Index Calculation Agent – without prejudice to possible obligations vis-à-vis licensees or index sponsors – has no obligation vis-à-vis third parties (including investors in financial instruments linked to the Index and/or financial intermediaries) to draw attention to any mistakes in the Index.

The Index Calculation Agent's indices do not represent a recommendation by the Index Calculation Agent to make an investment. In particular, the composition, calculation and publication of the indices do not in any way imply an assurance or opinion on the part of the Index Calculation Agent with respect to the purchase or sale of an index constituent or of a financial instrument linked to that index.

This Guide is available on the Information Page.

1.2. Basic principles

The Strategy Indices are calculated and composed, as far as possible, in accordance with the following principles:

- The Index should reflect the underlying Strategy defined by the Index Sponsor as closely as possible.

- The Index Sponsor makes decisions about the composition of the Index and any ordinary adjustments on its own authority.
- The current composition of an Index is updated daily and is available free of charge from the Index Calculation Agent.
- Index constituents are tradeable and available to an extent appropriate to the Strategy.
- A real portfolio can replicate the performance of the Index.
- The Index Strategy provides reliability and continuity.
- Changes in the rules are communicated with adequate advance notice (generally at least 5 Index Days). Changes to the Guide are never made with retrospective effect.

2. Index parameters

«**Index Calculation Agent**» is Bank Vontobel AG, Investment Banking / Financial Products, Gotthardstrasse 43, CH-8002 Zurich

«**Index Identifiers**» are:

- ISIN: CH0437786350
- Valor: 43778635
- WKN: A2RNZC

«**Index Start Date**» is 1 October 2018.

«**Index Start Level**» amounts to 100 points.

«**Index Day**» means each day on which the commercial banks in Zurich, Switzerland, are open for business transactions.

«**Information Page**» means

- <https://indices.vontobel.com>,
- <https://derinet.vontobel.com>, and/ or
- <https://zertifikate.vontobel.com>.

«**Index Currency**» is USD.

2.1. Index Sponsor

The Index Calculation Agent is advised by the Index Sponsor in connection with the composition of the Index. For this purpose, the index sponsor follows a specific procedure, defined and described under 2.2 below, according to which decisions are made with respect to the composition of the Index. The Index Sponsor is Bank Vontobel AG, Wealth Management / Investment & Distribution, Gotthardstrasse 43, CH-8002 Zürich.

The Index Sponsor selects and weights the respective Index components independently. It decides on the time and scope of changes in the Index composition without consulting the Index Calculation Agent and is responsible for the permanent monitoring of compliance with the Index Strategy and the Index Universe. The Index Calculation Agent, on the other

hand, is not responsible for monitoring compliance with the Strategy by the Index Sponsor.

The Index Sponsor may terminate the advisory agreement with the Index Calculation Agent at each last Index Day of a calendar quarter, giving two months' notice. In this case, the Index Calculation Agent shall proceed in accordance with 5.1.

2.2. Index Strategy

The Index reflects the performance of a virtual investment managed on the basis of a Strategy. This Strategy is determined by the index sponsor and the index sponsor is solely responsible for it. The Index Calculation Agent neither advises nor assists the index sponsor in connection with the preparation or implementation of the Strategy. The Index Calculation Agent is under no obligation to monitor the index sponsor's implementation of and compliance with the Strategy; it follows the decisions of the index sponsor relating to the selection and weighting of the relevant index constituents in principle without carrying out a review of its own.

The Strategy of the Index Sponsor follows a structured process for the selection of stocks in the e-Commerce sector based on an active bottom-up approach. Shares of e-Commerce companies that are active in the retail, business-to-business (B2B) and logistics sectors, among others (but not exclusively) are selected and included in the index. The geographical focus is not relevant.

The term e-Commerce covers the part of digital business that comprises the trade, purchase and sale of goods and services of all kinds via digital platforms and sales channels, as well as all types of business transactions that are both natural and adequately related (e.g. logistics). The focus will be on companies for which conventional valuation models are not applicable. In the future, companies will be jointly responsible for the disruptive change in trade and sales in the goods and services sector and will be among the potential winners in the offline to online shift. Companies with a business model aiming to strong growth are preferred.

The following restriction applies:

- Short selling of shares, other equities, ETFs, collective investment schemes, bonds, debentures or other debt instruments is not permitted.

2.3. Index Universe

The Index Universe determines the financial instruments that can be accepted as Index constituents. The Index Universe comprises:

- 1 Shares or other equities listed on a stock exchange in a country specified in Appendix 1;
- 2 Cash Components:
 - Eligible currencies: EUR, USD, GBP, CHF, HKD, JPY, CAD,
 - Cumulative weighting of all Cash Components mustn't exceed 50% of Index

Index components may not contain or grant any retrocessions or other financial benefits. The Index Sponsor ensures that any retrocessions and other financial benefits are credited to the Index (e. g. by increasing the Cash Component).

All Index components must feature sufficient market liquidity as determined by the Index Calculation Agent in its sole discretion.

2.4. Selection Process

The index sponsor pursues an active, arbitrary, discretionary investment process. The index universe and the composition at the start of the Index comprises companies that are predominantly active in the e-Commerce sector. The Selection Process is completely arbitrary and at the discretion of the Index Sponsor. Regular Ordinary Adjustments are planned.

2.5. Fees and Costs

2.5.1. Index Fee

The index fee amounts to 1.20% *per annum*.

The Index Fee is calculated on each Index Day on the basis of the respective current value of the index and is deducted *pro rata temporis* from the respective Cash Component on each Index Day.

2.5.2. Adjustment Fees

Additional fees are incurred in the event of ordinary adjustments of the index in accordance with 4.1 below («**Adjustment Fees**»).

The applicable Adjustment Fees are described in more detail in Appendix 1 and may be adjusted from time to time by the Index Calculation Agent in order to be able to replicate in the Index the fee charge of a real investment at any time.

Changes to the applicable Adjustment Fees will be published on the Information Page at least one month prior to becoming effective.

2.5.3. Other Costs

If and to the extent that, in accordance with the Index Strategy, a real investment would incur taxes, fees or other charges not covered by the Adjustment Fees described above («**Other Costs**»), the Index Calculation Agent shall take such costs into account when calculating the Index. Accordingly, other costs of the Strategy, in particular costs for collateral that would arise from real short selling positions in derivative financial instruments (e.g. forward transactions), are deducted from the Cash Component.

2.5.4. Cost of Index components

The Index components themselves can also be subject to fees and costs and thus indirectly have a reducing effect on the value of the Index. Such fees, e.g. management fees and distribution fees for collective investment schemes/investment units and structured products, are outlined by the respective manager/issuer in the respective documentation of the Index component (e.g. prospectus).

3. Index calculation

The Index will be calculated for the first time on the Index Start Date. The initial level of the Index on the Index Start Date corresponds to the Index Start Level. The respective current index level will be determined by the Index Calculation Agent once a day after the close of business for banks in Zurich (Switzerland), rounded to two decimals and normally

published by 10:00 a.m. (local time in Zurich) on the next Index Day in accordance with 5.1 below («**Closing Level**»).

One index point corresponds to one unit of the Index Currency.

3.1. Index formula

The Index level on an Index Day is the sum of the Valuation Prices for the Index components (including Cash Components, if any) multiplied by the corresponding number of this component in the Index. Accrued Index and Adjustment Fees and Other Costs are deducted from this amount.

The Index on an Index Day T is calculated according to the following formula:

$$IDX_T = \sum_{i=1}^n n_{i,T} \times V_{i,T} - F$$

where:

- T = current Index Day
- IDX_T = Index level after the close of business on Index Day T
- V_{i,T} = Valuation Price of Index constituent i on Index Day T
- n_{i,T} = number of Index constituent i in the Index on Index Day T
- F = Index and Adjustment Fees and Other Costs since the immediately preceding Index Day

3.2. Valuation Prices

The Index is calculated on each Index Day using the Valuation Prices for the Index constituents. The Index Calculation Agent determines the respective Valuation Prices after the close of business on an Index Day.

Depending on the type of Index constituent, the Index Calculation Agent bases its determination on:

TYPE	SOURCE OF VALUATION PRICE
Shares or other equities	Closing price at primary market (as determined by Index Calculation Agent)
Exchange traded units in funds (ETF)	Closing price at primary market (as determined by Index Calculation Agent)
Units in other Collective Investment Schemes/ Funds	In case of daily issue and redemption: <ul style="list-style-type: none"> – Net Asset Value as determined by relevant administrator for the Bank Business Day immediately preceding the current Bank Business Day, Otherwise: <ul style="list-style-type: none"> – Last published Net Asset Value
Derivative Instruments and Structured Products	<ul style="list-style-type: none"> – Valuation based upon prices of underlying and applying proprietary, adequate and generally accepted valuation models; if not available: – Price as disseminated by major financial information service provider.

Bonds, debentures and other debt instruments	– Price as disseminated by major financial information service provider; if not available:
	– Request for quotes to various, independent banks/ brokers; if not available:
	– Valuation based upon current price of - in terms of maturity and solvency - comparable, exchange traded instrument; if not available:
	– Valuation based upon current market return of comparable instruments

Precious metals	Price as disseminated by major financial information service provider
Cash Components	Nominal value. Fees and Costs are to be accrued or deducted for each Index Day.

The Calculation Agent may deviate from such sources in its reasonable discretion or may change such price sources in general without giving prior notice. Modifications to the valuation sources are published on the Information Page.

3.3. Currency translation

If the Valuation Price of an Index component is determined in a currency other than the Index Currency (or is a Cash Component in a currency other than the Index Currency), such amounts shall be converted into the Index Currency by the Index Calculation Agent at its reasonable discretion.

3.4. Index corrections

In case of calculation errors which the Index Calculation Agency deems to be material at its reasonable discretion, Index levels shall also be corrected retrospectively if this is technically possible and economically reasonable. Otherwise, no correction is made. Corrections will be published on the Information Page.

4. Adjustments to the Index composition

4.1. Ordinary Adjustment

The Index Sponsor selects and weighs the respective Index components independently within the framework of the Strategy determined by him and also decides on the time and scope of changes in the Index without consultation with or advice by the Index Calculation Agent (in each case an «**Ordinary Adjustment**»). However, the Index Calculation Agent may refuse to include individual instruments in the Index at any time without giving reasons, as well as request removal from the Index or a reduction in the weighting of individual Index components.

An Ordinary Adjustment can be made on any Index Day. Adjustment recommendations must be submitted by the Index Sponsor to the Index Calculation Agent by 3:00 p.m. (local time Zurich) on the respective Index Day at the latest in order to ensure implementation on the same day. Orders received later may be rejected by the Index Calculation Agent.

The new Index composition and the Index Day from which it takes effect shall be decided on a case-by-case basis by the Index Calculation Agent.

Ordinary Adjustments are subject to Adjustment Fees in accordance with section 2.5.3 above.

4.2. Extraordinary Adjustment

In case of extraordinary events relating to an Index component, the Index Calculation Agent shall adjust the composition of the Index and, if necessary, take further measures at its reasonable discretion which are suitable to enable the Index to be continued («**Extraordinary Adjustment**»).

The aim is to ensure continuous calculation and reproducibility of the Index even in case of extraordinary events. As a measure, for example, components can be removed from the Index.

The new Index composition and the Index Day from which it takes effect shall be decided on a case-by-case basis by the Index Calculation Agent.

Extraordinary events are

- Insolvencies and other credit events;
- mergers, takeovers, spin-offs, corporate actions (e.g. class conversions, conversions), delisting, and similar events;
- insufficient market liquidity in the opinion of the Index Calculation Agent;
- a violation of the Index Strategy or the Index Universe detected by the Index Calculation Agent;
- as well as all events whose tax, regulatory, legal, economic or other effects are comparable with one of the aforementioned events.

4.3. Stop Loss

If the value of the Index equals or is below 50% of the Index Start Level («**Stop-Loss Event**»), the Index Calculation Agent may terminate the advisory agreement with the Index Sponsor with respect to this Index without notice and extraordinarily.

In this case, the the Index Calculation Agent can adjust the Index without involving the Index Sponsor immediately after a Stop-Loss Event by dissolving all components and reallocating them into Cash Components.

In case of a Stop-Loss event, the the Index Calculation Agent is not obliged to act as described above, but decides at its own discretion and, if necessary, after consulting the Index Sponsor.

4.4. Distributions and interest

The Index is calculated as a performance index. Dividend payments as well as other distributions and income are recognized net of country-specific taxes, fees and other charges («**Net-Return**»). The most important, currently valid country-specific tax rates are published on the Information Page; in all other respects, the Index Calculation Agent decides at its discretion.

In the case of a cash distribution on Index components, the Index Calculation Agent will increase the Cash Components in the Index on the respective payment date in order to reflect the distribution. In addition, the Index Calculation Agent shall decide at its reasonable discretion on an appropriate Index adjustment to ensure that the Index reflects the performance that would result from a real portfolio.

In order to ensure the effective simulation of such a performance, Cash Components in the Index can be «interest-bearing». The applicable interest rate is determined from time to time by the Index Calculation Agent on the basis of prevailing market conditions for the respective currency and published on the Information Page. Depending on the current market interest rate environment, negative interest may be charged or, in the case of a negative balance, debit interest may be charged.

In the case of negative interest, the Index Calculation Agent may, at its discretion, take into account allowances for Cash Components in the respective Strategy Index which the Index Calculation Agent deems necessary to ensure effective simulation, in particular of changes in value and quantity; i.e. only if the Cash Component contained in the Strategy Index exceeds a possible allowance is the Cash Amount exceeding this allowance subject to negative interest.

4.5. Replicaability

In order to ensure that the index can be replicated (see section 1.2 Basic principles above), the Index Calculation Agent is entitled at any time and without consulting the Index Sponsor to increase or reduce the weighting of the Cash Component within the Index (with the result that the weightings of the other Index components are reduced or increased accordingly).

5. Changes to the Guide

5.1. Withdrawal of the Index Sponsor

If the Index sponsor terminates the advisory agreement with the Index Calculation Agent or if the Index sponsor no longer fulfils its consulting activities for any other reason, the index calculation agency can determine another index sponsor at its reasonable discretion or discontinue the Index calculation. The Index Calculation Agent will inform as soon as possible on the Information Page about its decision in the event of the withdrawal of the Index Sponsor.

5.2. Significant changes

The Index Calculation Agent is entitled to change the Index Universe and the Index Strategy at the proposal of the Index Sponsor and in compliance with the basic principles («**Significant Change**»).

5.3. Other changes

The method described in this Guide for calculating the Index is binding. Since a need for change cannot be ruled out, e.g. due to errors in the rules, changes in the market environment or due to regulatory, tax or other legal developments and changes, the Index Calculation Agent may make changes to this Guide and thus to the Index and its calculation method («**Other changes**»).

5.4. Entry into force

The Index Calculation Agent shall always provide adequate notice of changes to the Guide by publishing the modified Guide on the Information Page, dated on the Index Day of its entry into force.

Significant changes must be published on the Information Page at least three calendar months before they take effect.

In the case of other changes, the modified guide will generally be published on the Information Page at least five Index Days before it takes effect. In case of correction of errors in the guide, an immediate correction with simultaneous publication is permitted. Adjustments to this guide are never made retroactively.

6. Miscellaneous

6.1. Publications

All publications concerning the Index are published on the Information Page. Such publication shall be deemed to have taken place on the date of publication.

6.2. Distribution

The Index Level is published daily and distributed over:

- the Information Page.

The Index cannot be distributed in the event of data supply disruptions at the Index Calculation Agent or the above-mentioned data vendors.

6.3. Use of index data

The Index or index family is the intellectual property of the Index Calculation Agent, which reserves all rights. The the Index Calculation Agent enables its customers, e.g. banks, investment houses and securities issuers, to use the index data (index composition and index weighting) for issuing derivative financial instruments.

Appendix 1

In case of Ordinary Adjustments according to section 4.1 of the Guide the Index Calculation Agent applies the following fees:

Shares or other equities, ETFs	Fee, in basis points (bps)		Minimum Fee
	if Index Sponsor submits Adjustments		in
	via e-Service	not via e-Service	CHF
Belgium	10	20	100.00
Denmark	10	20	100.00
France	10	20	100.00
Finland	10	20	100.00
Germany	10	20	100.00
Hong Kong	10	20	100.00
Ireland	10	20	100.00
Italy	10	20	100.00
Japan	10	20	100.00
Netherlands	10	20	100.00
New Zealand	10	20	100.00
Norway	10	20	100.00
Portugal	10	20	100.00
Singapore	10	20	100.00
Sweden	10	20	100.00
Spain	10	20	100.00
Switzerland	10	20	100.00
USA	10	20	100.00
United Kingdom	10	20	100.00
Austria	15	25	100.00
Canada	15	25	100.00
Czech Republic	25	35	100.00
Greece	25	35	100.00
Hungary	25	35	100.00
Poland	40	55	100.00
Other	75	80	100.00

Important Notices:

- If Adjustments contain special qualifiers (e.g. discretionary), above fees will be increased by CHF 80.00.
- In case of absolute amounts stated as (minimum) fees, the Index Calculation Agent may translate these amounts into a relative value and apply to the Index Adjustments in a reasonable manner to replicate the cost effect, which a real portfolio would have to bear due to such a rebalancing.

Guide to the Disruptors Index

1. Introduction and basic data

This document («**Guide**») describes the composition, calculation and publication of the Disruptors Index (the «**Index**»). The index reflects the performance of a hypothetical portfolio, which is compiled and continuously managed by the Index Sponsor in accordance with the Strategy determined by it. The Strategy of the Index Sponsor is to select shares of companies that qualify as Disruptors according to its criteria.

1.1. Preliminary remarks

This Index forms part of the Vontobel Strategy Indices («**Strategy Indices**») family of indices. **The Strategy Indices are not recognised financial indices, but are indices designed and calculated by Bank Vontobel AG as the Index Calculation Agent, whose sole function consists of serving as the underlying for financial instruments.**

The Index Calculation Agent is advised by index sponsors for the purpose of the composition of the Strategy Indices. **The index sponsors act in principle at their own discretion and within the index strategy defined by themselves and for which they are responsible** (referred to in the following as «**Index Strategy**» or «**Strategy**»; see 2.2).

The Index Calculation Agent will carry out the calculation and composition of the Strategy Indices with the greatest possible care. However, the Index Calculation Agent and the index sponsors accept no obligation or liability with respect to the calculation and composition of the Strategy Indices. The Index Calculation Agent is not liable for direct or indirect losses arising from the incorrect calculation of the indices, their composition or the other key figures, unless they are due to gross negligence or wilful intent on the part of itself, its vicarious agents or their legal representatives. The Index Calculation Agent – without prejudice to possible obligations vis-à-vis licensees or index sponsors – has no obligation vis-à-vis third parties (including investors in financial instruments linked to the Index and/or financial intermediaries) to draw attention to any mistakes in the Index.

The Index Calculation Agent's indices do not represent a recommendation by the Index Calculation Agent to make an investment. In particular, the composition, calculation and publication of the indices do not in any way imply an assurance or opinion on the part of the Index Calculation Agent with respect to the purchase or sale of an index constituent or of a financial instrument linked to that index.

This Guide is available on the Information Page.

1.2. Basic principles

The Strategy Indices are calculated and composed, as far as possible, in accordance with the following principles:

- The Index should reflect the underlying Strategy defined by the Index Sponsor as closely as possible.

- The Index Sponsor makes decisions about the composition of the Index and any ordinary adjustments on its own authority.
- The current composition of an Index is updated daily and is available free of charge from the Index Calculation Agent.
- Index constituents are tradeable and available to an extent appropriate to the Strategy.
- A real portfolio can replicate the performance of the Index.
- The Index Strategy provides reliability and continuity.
- Changes in the rules are communicated with adequate advance notice (generally at least 5 Index Days). Changes to the Guide are never made with retrospective effect.

2. Index parameters

«**Index Calculation Agent**» is Bank Vontobel AG, Investment Banking / Financial Products, Gotthardstrasse 43, CH-8002 Zurich

- <https://derinet.vontobel.com>, and/ or
- <https://zertifikate.vontobel.com>.

«**Index Currency**» is USD.

2.1. Index Sponsor

The Index Calculation Agent is advised by the Index Sponsor in connection with the composition of the Index. For this purpose, the index sponsor follows a specific procedure, defined and described under 2.2 below, according to which decisions are made with respect to the composition of the Index. The Index Sponsor is Bank Vontobel AG, Wealth Management / Investment & Distribution, Gotthardstrasse 43, CH-8002 Zürich.

The Index Sponsor selects and weights the respective Index components independently. It decides on the time and scope of changes in the Index composition without consulting the Index Calculation Agent and is responsible for the permanent monitoring of compliance with the Index Strategy and the Index Universe. The Index Calculation Agent, on the other

hand, is not responsible for monitoring compliance with the Strategy by the Index Sponsor.

The Index Sponsor may terminate the advisory agreement with the Index Calculation Agent at each last Index Day of a calendar quarter, giving two months' notice. In this case, the Index Calculation Agent shall proceed in accordance with 5.1.

2.2. Index Strategy

The Index reflects the performance of a virtual investment managed on the basis of a Strategy. This Strategy is determined by the index sponsor and the index sponsor is solely responsible for it. The Index Calculation Agent neither advises nor assists the index sponsor in connection with the preparation or implementation of the Strategy. The Index Calculation Agent is under no obligation to monitor the index sponsor's implementation of and compliance with the Strategy; it follows the decisions of the index sponsor relating to the selection and weighting of the relevant index constituents in principle without carrying out a review of its own.

The Strategy of the Index Sponsor is to select shares of companies that have been qualified as Disruptors by the Index Sponsor. The Index Sponsor defines Disruptors as companies that benefit from rapid technological advances and changing demographics and consumer preferences. The Index should contain an active list of shares of companies that the Index Sponsor considers to be beneficiaries of the disruption trends.

The aim of the Strategy of the Index Sponsor is to achieve long-term capital growth. In addition, the Strategy is managed without reference to a benchmark, as there is no comparable one. The Index must contain at least 10 different components. Index components must have a market capitalization of at least USD 1 billion.

The following restriction applies:

- Short selling of shares, other equities, ETFs, collective investment schemes, bonds, debentures or other debt instruments is not permitted.

2.3. Index Universe

The Index Universe determines the financial instruments that can be accepted as Index constituents. The Index Universe comprises:

- 1 Shares or other equities listed on a stock exchange in a country specified in Appendix 1;
- 2 Cash Components:
 - Eligible currencies: EUR, USD, GBP, CHF, HKD, JPY, CAD, SEK, NOK, ZAR,
 - Cumulative weighting of all Cash Components mustn't exceed 50% of Index

Index components may not contain or grant any retrocessions or other financial benefits. The Index Sponsor ensures that any retrocessions and other financial benefits are credited to the Index (e. g. by increasing the Cash Component).

All Index components must feature sufficient market liquidity as determined by the Index Calculation Agent in its sole discretion.

2.4. Selection Process

The process for selecting individual index components is continuously driven forward by a proprietary and active investment approach of the Index Sponsor. Adjustments to the Index can be made at any time, but a minimum of four, maximum of 24 Ordinary Adjustments per year are planned. The decisions are made by the CIO Office / Strategy & Communications of the Wealth Management Investments & Distribution business unit of the Index Sponsor. Shares that are on the *blacklist* of Vontobel Wealth Management are generally excluded. This list is updated ad hoc by Wealth Management and is available on request from the Index Sponsor.

2.5. Fees and Costs

2.5.1. Index Fee

The index fee amounts to 1.25% *per annum*.

The Index Fee is calculated on each Index Day on the basis of the respective current value of the index and is deducted *pro rata temporis* from the respective Cash Component on each Index Day.

2.5.2. Adjustment Fees

Additional fees are incurred in the event of ordinary adjustments of the index in accordance with 4.1 below («**Adjustment Fees**»).

The applicable Adjustment Fees are described in more detail in Appendix 1 and may be adjusted from time to time by the Index Calculation Agent in order to be able to replicate in the Index the fee charge of a real investment at any time.

Changes to the applicable Adjustment Fees will be published on the Information Page at least one month prior to becoming effective.

2.5.3. Other Costs

If and to the extent that, in accordance with the Index Strategy, a real investment would incur taxes, fees or other charges not covered by the Adjustment Fees described above («**Other Costs**»), the Index Calculation Agent shall take such costs into account when calculating the Index. Accordingly, other costs of the Strategy, in particular costs for collateral that would arise from real short selling positions in derivative financial instruments (e.g. forward transactions), are deducted from the Cash Component.

2.5.4. Cost of Index components

The Index components themselves can also be subject to fees and costs and thus indirectly have a reducing effect on the value of the Index. Such fees, e.g. management fees and distribution fees for collective investment schemes/investment units and structured products, are outlined by the respective manager/issuer in the respective documentation of the Index component (e.g. prospectus).

3. Index calculation

The Index will be calculated for the first time on the Index Start Date. The initial level of the Index on the Index Start Date corresponds to the Index Start Level. The respective current index level will be determined by the Index Calculation Agent once a day after the close of business for banks in Zurich (Switzerland), rounded to two decimals and normally

published by 10:00 a.m. (local time in Zurich) on the next Index Day in accordance with 5.1 below («**Closing Level**»).

One index point corresponds to one unit of the Index Currency.

3.1. Index formula

The Index level on an Index Day is the sum of the Valuation Prices for the Index components (including Cash Components, if any) multiplied by the corresponding number of this component in the Index. Accrued Index and Adjustment Fees and Other Costs are deducted from this amount.

The Index on an Index Day T is calculated according to the following formula:

$$IDX_T = \sum_{i=1}^n n_{i,T} \times V_{i,T} - F$$

where:

T	=	current Index Day
IDX _T	=	Index level after the close of business on Index Day T
V _{i,T}	=	Valuation Price of Index constituent i on Index Day T
n _{i,T}	=	number of Index constituent i in the Index on Index Day T
F	=	Index and Adjustment Fees and Other Costs since the immediately preceding Index Day

3.2. Valuation Prices

The Index is calculated on each Index Day using the Valuation Prices for the Index constituents. The Index Calculation Agent determines the respective Valuation Prices after the close of business on an Index Day.

Depending on the type of Index constituent, the Index Calculation Agent bases its determination on:

TYPE	SOURCE OF VALUATION PRICE
Shares or other equities	Closing price at primary market (as determined by Index Calculation Agent)
Exchange traded units in funds (ETF)	Closing price at primary market (as determined by Index Calculation Agent)
Units in other Collective Investment Schemes/ Funds	In case of daily issue and redemption: — Net Asset Value as determined by relevant administrator for the Bank Business Day immediately preceding the current Bank Business Day, Otherwise: — Last published Net Asset Value
Derivative Instruments and Structured Products	— Valuation based upon prices of underlying and applying proprietary, adequate and generally accepted valuation models; if not available: — Price as disseminated by major financial information service provider.

Bonds, debentures and other debt instruments	— Price as disseminated by major financial information service provider; if not available:
	— Request for quotes to various, independent banks/ brokers; if not available:
	— Valuation based upon current price of - in terms of maturity and solvency - comparable, exchange traded instrument; if not available:
	— Valuation based upon current market return of comparable instruments

Precious metals	Price as disseminated by major financial information service provider
Cash Components	Nominal value. Fees and Costs are to be accrued or deducted for each Index Day.

The Calculation Agent may deviate from such sources in its reasonable discretion or may change such price sources in general without giving prior notice. Modifications to the valuation sources are published on the Information Page.

3.3. Currency translation

If the Valuation Price of an Index component is determined in a currency other than the Index Currency (or is a Cash Component in a currency other than the Index Currency), such amounts shall be converted into the Index Currency by the Index Calculation Agent at its reasonable discretion.

3.4. Index corrections

In case of calculation errors which the Index Calculation Agency deems to be material at its reasonable discretion, Index levels shall also be corrected retrospectively if this is technically possible and economically reasonable. Otherwise, no correction is made. Corrections will be published on the Information Page.

4. Adjustments to the Index composition

4.1. Ordinary Adjustment

The Index Sponsor selects and weighs the respective Index components independently within the framework of the Strategy determined by him and also decides on the time and scope of changes in the Index without consultation with or advice by the Index Calculation Agent (in each case an «**Ordinary Adjustment**»). However, the Index Calculation Agent may refuse to include individual instruments in the Index at any time without giving reasons, as well as request removal from the Index or a reduction in the weighting of individual Index components.

An Ordinary Adjustment can be made on any Index Day. Adjustment recommendations must be submitted by the Index Sponsor to the Index Calculation Agent by 3:00 p.m. (local time Zurich) on the respective Index Day at the latest in order to ensure implementation on the same day. Orders received later may be rejected by the Index Calculation Agent.

The new Index composition and the Index Day from which it takes effect shall be decided on a case-by-case basis by the Index Calculation Agent.

Ordinary Adjustments are subject to Adjustment Fees in accordance with section 2.5.3 above.

4.2. Extraordinary Adjustment

In case of extraordinary events relating to an Index component, the Index Calculation Agent shall adjust the composition of the Index and, if necessary, take further measures at its reasonable discretion which are suitable to enable the Index to be continued («**Extraordinary Adjustment**»).

The aim is to ensure continuous calculation and reproducibility of the Index even in case of extraordinary events. As a measure, for example, components can be removed from the Index.

The new Index composition and the Index Day from which it takes effect shall be decided on a case-by-case basis by the Index Calculation Agent.

Extraordinary events are

- Insolvencies and other credit events;
- mergers, takeovers, spin-offs, corporate actions (e.g. class conversions, conversions), delisting, and similar events;
- insufficient market liquidity in the opinion of the Index Calculation Agent;
- a violation of the Index Strategy or the Index Universe detected by the Index Calculation Agent;
- as well as all events whose tax, regulatory, legal, economic or other effects are comparable with one of the aforementioned events.

4.3. Stop Loss

If the value of the Index equals or is below 50% of the Index Start Level («**Stop-Loss Event**»), the Index Calculation Agent may terminate the advisory agreement with the Index Sponsor with respect to this Index without notice and extraordinarily.

In this case, the the Index Calculation Agent can adjust the Index without involving the Index Sponsor immediately after a Stop-Loss Event by dissolving all components and reallocating them into Cash Components.

In case of a Stop-Loss event, the the Index Calculation Agent is not obliged to act as described above, but decides at its own discretion and, if necessary, after consulting the Index Sponsor.

4.4. Distributions and interest

The Index is calculated as a performance index. Dividend payments as well as other distributions and income are recognized net of country-specific taxes, fees and other charges («**Net-Return**»). The most important, currently valid country-specific tax rates are published on the Information Page; in all other respects, the Index Calculation Agent decides at its discretion.

In the case of a cash distribution on Index components, the Index Calculation Agent will increase the Cash Components in the Index on the respective payment date in order to reflect the distribution. In addition, the Index Calculation Agent shall decide at its reasonable discretion on an appropriate Index adjustment to ensure that the Index reflects the performance that would result from a real portfolio.

In order to ensure the effective simulation of such a performance, Cash Components in the Index can be «interest-bearing». The applicable interest rate is determined from time to time by the Index Calculation Agent on the basis of prevailing market conditions for the respective currency and published on the Information Page. Depending on the current market interest rate environment, negative interest may be charged or, in the case of a negative balance, debit interest may be charged.

In the case of negative interest, the Index Calculation Agent may, at its discretion, take into account allowances for Cash Components in the respective Strategy Index which the Index Calculation Agent deems necessary to ensure effective simulation, in particular of changes in value and quantity; i.e. only if the Cash Component contained in the Strategy Index exceeds a possible allowance is the Cash Amount exceeding this allowance subject to negative interest.

4.5. Replicaability

In order to ensure that the index can be replicated (see section 1.2 Basic principles above), the Index Calculation Agent is entitled at any time and without consulting the Index Sponsor to increase or reduce the weighting of the Cash Component within the Index (with the result that the weightings of the other Index components are reduced or increased accordingly).

5. Changes to the Guide

5.1. Withdrawal of the Index Sponsor

If the Index sponsor terminates the advisory agreement with the Index Calculation Agent or if the Index sponsor no longer fulfils its consulting activities for any other reason, the index calculation agency can determine another index sponsor at its reasonable discretion or discontinue the Index calculation. The Index Calculation Agent will inform as soon as possible on the Information Page about its decision in the event of the withdrawal of the Index Sponsor.

5.2. Significant changes

The Index Calculation Agent is entitled to change the Index Universe and the Index Strategy at the proposal of the Index Sponsor and in compliance with the basic principles («**Significant Change**»).

5.3. Other changes

The method described in this Guide for calculating the Index is binding. Since a need for change cannot be ruled out, e.g. due to errors in the rules, changes in the market environment or due to regulatory, tax or other legal developments and changes, the Index Calculation Agent may make changes to this Guide and thus to the Index and its calculation method («**Other changes**»).

5.4. Entry into force

The Index Calculation Agent shall always provide adequate notice of changes to the Guide by publishing the modified Guide on the Information Page, dated on the Index Day of its entry into force.

Significant changes must be published on the Information Page at least three calendar months before they take effect.

In the case of other changes, the modified guide will generally be published on the Information Page at least five Index Days before it takes effect. In case of correction of errors in the guide, an immediate correction with simultaneous publication is permitted. Adjustments to this guide are never made retroactively.

6. Miscellaneous

6.1. Publications

All publications concerning the Index are published on the Information Page. Such publication shall be deemed to have taken place on the date of publication.

6.2. Distribution

The Index Level is published daily and distributed over:

- the Information Page.

The Index cannot be distributed in the event of data supply disruptions at the Index Calculation Agent or the above-mentioned data vendors.

6.3. Use of index data

The Index or index family is the intellectual property of the Index Calculation Agent, which reserves all rights. The the Index Calculation Agent enables its customers, e.g. banks, investment houses and securities issuers, to use the index data (index composition and index weighting) for issuing derivative financial instruments.

Appendix 1

In case of Ordinary Adjustments according to section 4.1 of the Guide the Index Calculation Agent applies the following fees:

Shares or other equities, ETFs	Fee, in basis points (bps)	
	if Index Sponsor submits Adjustments	
	via e-Service	not via e-Service
Belgium	10	20
Denmark	10	20
France	10	20
Finland	10	20
Germany	10	20
Hong Kong	10	20
Ireland	10	20
Italy	10	20
Japan	10	20
Netherlands	10	20
New Zealand	10	20
Norway	10	20
Portugal	10	20
Singapore	10	20
Sweden	10	20
Spain	10	20
Switzerland	10	20
USA	10	20
United Kingdom	10	20
Australia	15	25
Austria	15	25
Canada	15	25
Indonesia	15	25
Malaysia	15	25
Mexico	15	25
Philippines	15	25
South Africa	15	25
Thailand	15	25
Turkey	15	25
Czech Republic	25	35
Greece	25	35
Hungary	25	35
Poland	40	55
Korea	65	80
Other	75	80
Structured products		
issued by Vontobel entity:	10	20
not issued by Vontobel entity:	25	35
Funds		
All	25	35
Bonds		
All	10	20

Important Notices:

- If Adjustments contain special qualifiers (e.g. discretionary), above fees will be increased by CHF 80.00.
- In case of absolute amounts stated as (minimum) fees, the Index Calculation Agent may translate these amounts into a relative value and apply to the Index Adjustments in a reasonable manner to replicate the cost effect, which a real portfolio would have to bear due to such a rebalancing.
